

Paolo Gibin

I have developed a long-standing work experience in leading companies where I have gained a strong business advisory competence successfully conducting significant projects in Corporate Finance, Asset Management, M&A, IAS/IFRS Compliance, Governance, Risk Management, and Information Technology. Having achieved the Business Administration degree at SAA of Turin and the Economics degree at Turin University, I have completed my education with the Executive General Management Program at ESCP - Ecole Supérieure de Commerce de Paris. I have been, for several years, correspondence member of EFRAG (the advisory agency of European Commission) and participant of ETAF (the IFRS working group of Telecommunication companies) lobbying towards IASB.

I am passionate on new business initiatives and innovative technologies and I support a venture angel network in business modelling and valuation.

I am enthusiastic web and mobile developer, and it happens I put my hands on coding!
