

VESSEL DESIGN PERSPECTIVES: SOLAR BOATS AND GREENER SHIPS

March, 25th 2021
17:00-18:00

iCat - Tomislav Uroda

iCat company develops innovative, energy efficient and environmentally-friendly projects in the maritime sector, applying technologically advanced and economically efficient solutions. The company has been set-up in 2011 and in 2018 started the production in Zagreb (Croatia). In 2019 iCat delivered three electrical solar vessels for the National park of Mljet (Croatia). Their "iCat Technology" has been awarded and their "solarCat" vessel was finished and presented in 2020.

GLO Marine - Radu Procop

GLO Marine is a project-oriented organization that puts emphasis on efficiency, quality and control. Provides a comprehensive range of services: design, engineering and project management to the maritime and oil & gas industries. GLO Marine offers smart and customized solutions that cover the full engineering and design cycles for all types of marine and offshore vessels.
